

## **POLICY ON EDUCATIONAL RESOURCES COMMITTED TO CRITICAL CARE PROGRAMS**

### **PURPOSE:**

This policy is designed to outline the institutional coordination of educational resources for critical care programs.

### **POLICY:**

Use of GWU Medical Center resources by the critical care anesthesiology, critical care medicine, and pulmonary diseases/critical care medicine residency programs should be coordinated through the Associate Dean for Graduate Medical Education. All resources will be shared by all critical care programs to ensure the greatest opportunity for residents to develop skills in clinical care and judgment, teaching, administration, and research. Compliance with RRC requirements for educational opportunities will be monitored and reviewed during the GME Committee's internal review process.
