

**Associate or Full Professor
Cancer Epidemiologist**

**The George Washington University
School of Public Health and Health Services and Cancer Institute**

The Department of Epidemiology and Biostatistics of the GWU School of Public Health and Health Services, and the GW Cancer Institute invite applications for a full-time tenure track or tenured faculty member at the rank of Associate or Full Professor. The successful applicant will be expected to build a dynamic, NCI-funded research program and be involved in teaching and mentoring activities. Rank, salary and employment position will be commensurate with experience.

The Department of Epidemiology and Biostatistics has expertise in cancer, HIV/AIDS, cardiovascular, behavioral, and aging epidemiology; health disparities, public health laboratory science, geographical health information systems, and biostatistical methods. The Department also has a strong affiliation with the GWU Biostatistics Center renowned for its leadership in the design and coordination of large multi-center clinical trials in cardiovascular disease, diabetes, and maternal/fetal medicine.

The GW Cancer Institute (GWCI) is dedicated to advancing multi- and trans-disciplinary research in cancer biology, population science, and clinical/translational science, and to cancer outreach and education in the context of community-based research. GWCI is a matrix cancer center with over forty faculty members from four GWU Schools (Medicine, Public Health, Engineering, Arts and Sciences), seventeen Departments, and a number of affiliated institutions including Children's National Medical Center. Central to GWCI's mission is understanding and eliminating cancer health disparities.

Basic Qualifications: Applicants must have either a doctoral degree in epidemiology or in medicine with advanced training and experience in epidemiology, evidence of excellence in teaching and mentoring in a graduate-level epidemiology degree program, record of peer-reviewed publications in cancer epidemiology, and demonstrated success in securing external research funding.

Preferred Qualifications: Demonstrated experience in or commitment to mentoring junior faculty; demonstrated commitment to service and leadership; strong verbal and written communication skills; demonstrated commitment to engaging in collaborative research within the School, GW Medical Center, and University as well as with governmental and non-governmental entities. Current research funding from the NCI is optimal.

Responsibilities will include maintaining an active research program in cancer epidemiology; teaching graduate-level courses in epidemiologic methods and in topical areas of expertise as related to cancer epidemiology; and advising masters and doctoral-level students. Review of applications will begin on February 15, 2010 and will continue until the position is filled. Applications from women and minorities are strongly encouraged.

Application Procedure: To be considered, interested applicants should submit the following documents electronically: 1) a curriculum vitae; 2) a statement of research interests and accomplishments and plans for maintaining an independently-funded research program; and 3) a statement of teaching and mentoring experience and description of the courses you are interested in teaching, to:

Search Committee, Cancer Epidemiologist
c/o Stephanie Panichello, Department Manager
Department of Epidemiology and Biostatistics

School of Public Health and Health Services
The George Washington University
epibiojobs@gwumc.edu (please submit all materials electronically to this e-mail address)
Please include Position Tracking Number EPI 09-03 in email subject line.

Only complete applications will be considered.
