Honors/Awards		
50 Years of Women at Georgia Tech – First Woman Buzz		
Pastimes Running, performing, volunteering, travel, hiking, language study		
What was best about the students at the School of Public Health and Health Services when I was a student A high percentage of people had experience; they were willing to share their knowledge, which enriched the program.		
What’s best about the School of Public Health and Health Services at GW The professors all seemed to have hands-on knowledge and were known as experts in their fields.		
What was best about living in the Washington, DC Area There were so many interesting people from all over the US and the country. Many of them had strong beliefs in the greater public good.		

My message to applicants

You get as much from the program as you put into it.
