| Volunteer Experience | Title | Organization/Website |
| | | |
| Honors/Awards | | |
| Pastimes Running, traveling | | |
| My Future Goals Continue a career in clinical trials while expanding my knowledge to international trials in developing countries, and concentrating on women's health issues, namely HIV prevention and contraception. | | |
| What was best about the School of Public Health and Health Services at GW The diversity of the students and the professors | | |
| What was best about living in the Washington, DC Area The diversity also, and that it is constantly changing and there are things to do, and the weather is great, 4 real seasons! | | |
| My message to applicants GW is a great place to get an MPH for the many opportunities its staff and professors can lead you to. There are so many public health organizations that can lead to potential internships or jobs/careers. The diversity of the school draws students from all over the world and having people like this in class with you is a unique and great experience. | | |
